

firelight^o and ExamOne

FireLight's integration with ExamOne enables paramed exam scheduling directly within the FireLight application process, either pre- or post-signature. This integration simplifies scheduling, reduces unnecessary exams, cuts costs associated with unsubmitted applications, and enhances the client experience.

How It Works:

FireLight integrates with ExamOne's ScheduleNow™ to identify and return examiner options from ExamOne offices, Quest Diagnostics PSCs, or mobile examiners. Agents can schedule exams directly in FireLight, submit paramed orders, and track status updates (complete, canceled, action needed) through the Message Center.

Paramed Integration Benefits:

Carrier

Simplifies life application processing with integrated exam scheduling, order placement and status updates in FireLight.

Agent

Speeds up exam scheduling during the application process, enhancing efficiency and client experience

Client

Provides a seamless buying experience with easy exam scheduling, status updates, and support

How to Get Started or Learn More:

To use the ExamOne Paramedical Exam services, FireLight clients must have a contract established between your organization and ExamOne.

Contact John Reynolds, SVP, Commercial & Business Development at john.j.reynolds@examone.com.
