FireLight Platform Features

Single Code Base for All Lines of Business

Remove the need for numerous systems with a single technology that supports your needs. FireLight sales platform creates and manages user experiences, business rules, integrations and more.

Interconnected, Cohesive Sales Activities

Tailor your entire sales lifecycle to support your business. From pre-sale functions through servicing the policy, FireLight provides the tools to create a seamless sales process.

Self-Management Admin System

FireLight provides a comprehensive admin system that enables you to power the experience without relying on developers or third parties. Customize workflows, data collection, user experiences and more.

Multiple UI and UX Options

Create unique and cohesive sales experiences with multiple UI/UX options. You can even make your FireLight services available on third-party solutions with the FireLight embedded API.

Sales Transparency and Business Intelligence

Gain the insights necessary to move your business forward with FireLight. Funnel data from various streams into your dashboard to view statistics and identify trends.

Flexible Data Transmission Formats

Use the file formats that your most comfortable with. FireLight supports ACORD 103, Depository Trust & Clearing Corporation's (DTCC) Applications & Premium (APP) and Subsequent Premiums (SUB) services, and third-party and proprietary file formats.

Robust API Framework

FireLight's API layer opens the door to supporting your unique sales strategies. Use the FireLight API to connect with outside systems and build custom workflows and sales systems.

Built-In Multiple E-Signature Options

A proprietary e-signature feature, available at no additional cost for FireLight transactions, offers multiple capture options in both connected and offline instances. E-signature is built into FireLight sales components, processes and workflows.

Reuse of Rules, Experiences and Integrations

Save time, money and work while increasing operational efficiency. With FireLight you create rules once, reuse them in different sales activities and then deploy them to your various channels.

Form and Wizard Designers

Create unique, responsive forms and wizard experiences with speed and ease. Build to fit consumer needs and your product offerings and deliver an intuitive sales experience.

Connected and Disconnected Sales Access

Achieve sales anytime, anywhere through connected and disconnected functionality. Complete connected sales activities through standard browsers and use disconnected capabilities across sales activities.

User Management Tool

Manage advisor access to FireLight and support record retention processes. FireLight Access provides distributors the ability to onboard advisors with limited tech and no integration or single sign on requirements.
